

*Proper
examples of an
IDT Satellite
Field Unit
installation in a
pasture location*

-Mount the IDT Satellite Field Unit 2' feet inside the outer area of the fencing at minimum to prevent damage caused by livestock. Set-up may require a special installation that could include a post, trenching, conduit etc. or a modification to the permanent fencing.

-Do Not mount the IDT Satellite Field Unit to the fencing or corner post.

-Contact Southwest Water Authority for instructions on this type of installation.
